

Pictorial and video timeline of Finlay pre and post seizure by the police

These pictures show that Finlay was found at a very young age, was rehabilitated in a purpose built, naturalistic enclosure and was in excellent condition prior to his seizure by the police. The post-seizure pictures (accompanied by the vet reports) show the significant deterioration in Finlay's body and coat condition during his time in police care. Latterly, the photos show the significant improvement in Finlay's coat and body condition thanks to the post-seizure care provided to him by Wildcat Haven

Finlay shortly after he was first rescued at around three weeks old by John and Angela in October 2020

Finlay in his 'indoor forest' in November 2020

Rehabilitation enclosure, measuring around 85 ft by 29ft wide by 10ft high, containing natural vegetation. Completed in April 2021

Finlay exploring his enclosure and using natural cover

Finlay displaying natural scent marking behaviour
